EX 5 - Task Analysis – Online Appointment Booking System

Task Analysis – Online Appointment Booking System

Task Analysis

Task Analysis is the process of breaking down a user's interactions with an Online Appointment Booking system into smaller, manageable steps to understand how users schedule appointments efficiently. It helps in identifying user needs, reducing waiting time, and improving booking experience.

Key Aspects of Task Analysis:

• Understanding what tasks users perform (booking, rescheduling, canceling appointments).
• Identifying the sequence of actions required to book an appointment.
• Analyzing user pain points such as unavailable slots or payment failures.
• Defining requirements to improve user experience and reduce manual effort.

User Flow

User Flow is a visual representation of how users navigate through the appointment booking application to successfully schedule an appointment. It shows the step-by-step journey from login to booking confirmation.

User Flow for Online Appointment Booking System

Start → Open App → Login/Register → Select Service/Doctor → View Details → Select Date → Select Time Slot → Check Availability → Enter Personal Details → Choose Payment Method → Payment Confirmation → Appointment Confirmation → Track/Manage Appointment

User Flow for Online Appointment Booking System – Detailed Explanation

Step 1: Start

• The user opens the Online Appointment Booking application.
• The home screen is displayed.

Step 2: Login or Register

EX 5 - Task Analysis – Online Appointment Booking System

• If the user already has an account, they log in.
• If not, they must register by entering required details (Name, Email, Phone, Password).

Step 3: Select Service or Doctor

• The user selects a service (e.g., General Checkup, Dentist, Salon Service).
• A list of available doctors/service providers is displayed.

Step 4: View Service Details

• The user views details such as specialization, experience, ratings, and availability.
• The user clicks on “Book Appointment”.

Step 5: Select Date

• The user chooses a preferred date from available calendar options.

Step 6: Select Time Slot

• The user selects a time slot from available options.

• If the slot is unavailable, the system prompts the user to choose another time.

Step 7: Enter Personal Details

• The user enters required information such as:

- Name
- Contact Number
- Reason for Visit

Step 8: Payment Process

• The user selects a payment method:

- Online Payment
- Pay at Clinic
